

Jamie Stern's Amazon features a naturalistic embossed animal pattern inspired by the diverse reptile species that can be found along the mighty South American river from which this leather takes its name. Produced on sides (half hides), Amazon is embossed with maximum pressure, dwell and heat to ensure that the leather's precise pattern is consistent and even throughout. After the print is applied, the sides are then finished with a semi-aniline topcoat that provides an even base coloration and protects the leathers from scratching, staining and fading in sunlight. After this initial coloring, each side receives a second hand-wiped coat of pigment to emphasize the pattern and create a gorgeous two-tone effect.
