LEATHER

HEAVY METAL

Heavy Metal is a brilliant full grain leather with an undeniably luxurious metallic sheen. To achieve this singular appearance, traditional aniline dyes are combined with metallic additives to create a bright, polished luster while still allowing the leather to maintain its renowned durability and natural characteristics.

In addition to providing the leather with its alluring shine, Heavy Metal's semi-aniline finish also protects the hides from scratching and fading in sunlight, ensuring they retain their beautiful appearance for years to come. With 21 standard colors ranging from Ocean Side to Antique Bronze and custom colors available for a one-hide minimum, Heavy Metal is ideally suited for any project where a touch of opulence is desired.

SPECIFICATIONS

Content	Full Grain Cowhide
Country of Origin	Finished in the USA from European raw material
Finish	Semi-aniline
Texture	Smooth, naturalistic grain with metallic sheen
